Skeletal remains and clandestine grave sites
Presented By: Dr. Lerah Sutton, University of Florida

Burial sites and clandestine graves are challenging for crime scene personnel. The importance of documentation and proper collection of critical evidence is a key component to a successful outcome. This four-hour training will expose attendees to the challenges of these types of crime scenes, how to document and gather evidence, as well as important information when collecting skeletal remains. This training will encompass lecture and a hands-on practical.

Dr. Lerah Sutton is the Director of the Forensic Medicine Educational Program at the University of Florida’s College of Medicine and the Assistant Director for the UF Maples Center for Forensic Medicine. As Program Director she teaches numerous academic courses on topics including Artifacts of Decomposition and Forensic Investigations within the Forensic Medicine Master’s Degree Program – a program for which she was instrumental in the design and development – and oversees other program faculty, instructors, and staff. She holds five degrees from the University of Florida: a PhD in Forensic Anthropology, a master’s degree in Forensic Science, Graduate Certificates in Forensic Death Investigation and Veterinary Forensic Science, and a bachelor’s degree in Anthropology which she earned with highest honors. Prior to her academic career she was employed at the Florida District 7 and 24 Office of the Medical Examiner.
