

# FDIAI REGION III TRAINING

## Forensic Chemicals Overview

*Presenter: Nancy Sulinski-Steffens*

FDIAI Region 3 Director

This course will provide you with in-depth instruction on the correct procedures to take when processing forensic evidence at a crime scene or in a lab. This course will focus on locating, documenting and chemically processing forensic evidence on various substrates. This virtual course will provide lecture and demonstrative techniques for proper processing of porous and non-porous surfaces, best practices for presumptive tests and techniques for chemical search methods including Bluestar Forensic. A basic overview of timed exposure will also be covered to document Bluestar results.

Date: October 16, 2020 1000-1400 hours

Location: Live Virtual Zoom Training

\*Not approved for IAI recertification credits

Space is limited to 50 attendees

RSVP TO: Nancy Sulinski-Steffens, Region 3 Director
