

LIVE WEBINAR

READING FIREARMS:

A Forensic Guide to Safe Handling, Identification Markings, and Case-Ready Documentation

March 31, 2026 | 1100-1230 EST

COURSE DESCRIPTION

This webinar walks attendees through the essential steps of safely handling a firearm, understanding its mechanical behavior, and recognizing the features that define its identity.

Participants will learn how to locate make, model, caliber, and serial number information across various firearm designs, and how these markings influence investigative pathways. This presentation will also highlight how to translate these observations into clear, complete, and courtroom-defensible documentation for evidence submissions and case files.

Whether you work at the scene, in the lab, or are studying to enter the forensic field, this session provides practical, actionable skills to support accurate firearm inspection and strengthen the forensic narrative behind every case.

WHY CHOOSE US?

Our specialized training and resources bridge the gap between generic leadership courses and traditional forensic technician training, equipping you with the skills and knowledge needed for professional development in your forensic career.
